

IN THE SPECIFICATION:

Please replace paragraph 0005, which begins on page 1, line 26, with the following amended paragraph.

The said multicore cable is said to be flexible since each multi-wire conductor of which it is composed is in turn composed of a collected assembly of wires of copper, aluminium, tinned copper or other alloys with diameter less than or equal to 0.61 mm in accordance with the requirements of classes V and VI of standard IEC-60228. Obviously each multi-wire conductor is surrounded by a layer of insulating material such as PVC, polyethylene, crosslinked polyethylene, ethylene-propylene, thermoplastic rubbers and halogen-free materials.
